1. Systematically reveal ancient scientific wisdom explained in the world's most revered holy scriptures like Vedas, Bible, Koran, Sufi and others in unambiguous terms.
2. Suggest the applications thereof, towards their use in modern technology.
3. Unravel theorems and mathematical formulae found in them.
4. Convince the educational institutions to reintroduce them in their courses.
5. Allay and reduce superstition, blind faith and unscientific rituals.

Dr. P.V.N.Murthy's

Trend-setting discovery

LINGUAMATHS

LINGUAMATHS is the mathematics of languages, a path-breaking discovery of Dr. Murthy, former Systems Manager of Air-India Mumbai, author of widely-read "Raamaayanha Rahasya" in English and Thamizh and Founder-Chairman of VEDIC SCIENCE RESEARCH INSTITUTE. Linguamaths exposes that the whole gamut of Vedic and allied literature is virtually textbooks on all conceivable subjects of sciences, mathematics, engineering, medicines, and technology. Name a so-called modern theorem, and it is there in Vedic Literature in almost identical terms. Pythagorus, Archimedes, Aristotle, Darwin, John Dalton, Isaac Newton, Einstein, Neil Bohr, Lebneitz, Fourier, Legrance, Chebinov, and all are there already. Surprisingly the same Linguamaths proves that the most ancient Sangam Thamizh Literature also has them.

The power of LINGUAMATHS is the basis for entire syllabus for the proposed University, the magazines, and the Seminars. For details:
